INDOOR CONCEPT

I mobili hanno un valore quando servono per vivere meglio il mutare del tempo e delle abitudini. Una zona giorno, i programmi di sedute, tavoli e complementi pensati per potersi adattare al nostro stile. Una proposta che ci assomiglia senza essere banalmente di servizio, abbiamo valorizzato le collezioni in grado di costruire degli ambienti coordinati. Forma ed emozione si associano alle qualità visibili ed invisibili del nostro programma Indoor: ogni progetto accoglierà i nostri amici, la nostra intimità e il nostro carattere. Le connessioni tra le varie famiglie esprimono anche una cultura multimaterica dedicata alla scelta di materiali come il legno, la pietra il metallo. Indoor e Outdoor, due mondi con funzioni parallele, ma un unico linguaggio: multimaterico, con una profonda sensibilità ai materiali. Perché abitiamo la casa con profondità e sensibilità.

The furniture has a value when you need them to live better the changes of time and habits. A living, the programs of chairs, tables and accessories designed to adapt to our style. A proposal that we like without being trivially service, we have enhanced the collections can build coordinated environments. Form and emotion are associated with visible and invisible qualities of our program Indoor: every project will welcome our friends, our intimacy and our character. The connections between the various families also express a culture multimaterica with the choice of materials such as wood, stone metal. Indoor and Outdoor both worlds with parallel functions, but a single language: multimaterico, with a deep sensitivity to the materials. Because we live in the house with depth and sensitivity.

DESIGNER

Dai maestri del passato hanno imparato che architetto e designer sono due professioni indissolubili: dai progetti su larga scala, agli allestimenti e ai più piccoli oggetti, Calvi e Brambilla amano sperimentare con rimandi alla classicità e una grande attenzione verso le ultime innovazioni tecnologiche.

The masters of the past have taught them that architect and designer are two inseparable professions: from large-scale projects to creating ambiances and the smallest objects, Calvi and Brambilla love experimenting with one eye on classics and careful attention paid to the latest technological innovations.

[CALVI & BRAMBILLA]

La sua attività pluridecennale di grafico gli consente di avere un approccio fresco e disincantato verso il design. Linee rigorose e allo stesso tempo divertenti caratterizzano tutti i suoi lavori, dall'editoria ai prodotti.

His many years of activity as a graphics artist give him a fresh and disenchanted approach to design. Rigorous but amusing lines distinguish all his works, from publishing to products.

[CHRISTOPH RADL]

La loro collaborazione si sviluppa in un dialogo continuo di motivi estetici e culturali, accompagnato da un evolversi di metodi funzionali e produttivi. L'obiettivo è la realizzazione di progetti che uniscano questi due fondamentali.

Their collaboration develops in a continuous discussion of aesthetic and cultural motives, together with advancing functional and production methods. The aim is to implement projects that bring together these two fundamentals.

[GIOPATO & COOMBES]

Inglese per nascita, svedese per formazione. Il suo design si muove tra quello tradizionale scandinavo, tra materiali classici come il legno e quelli più moderni come il plexiglass; tra ispirazioni afro, personaggi dei videogame e del folklore nordico.

English by birth, Swedish by training. Her design is influenced by traditional scandinavian styling, classic materials such as wood and modern ones such as plexiglas, and is inspired by the afro style, videogame characters and nordic folklore.

[ANKI GNEIB]

Le linee classiche dei suoi pezzi evidenziano la formazione del designer maltese, per anni collaboratore di importanti studi di architettura. La sua mano delicata e versatile porta nei diversi progetti un tocco discreto ed elegante tipico del grande design internazionale.

The classical lines of his pieces testify to this maltese designer's training gained in important architect's studios. His delicate versatile hand lends his projects the discerning elegant touch typical of great international design.

[GORDON GUILLAUMIER]

Parallelamente alla ricerca pittorica si sviluppa il suo impegno nei campi del disegno industriale e dell'architettura. Il suo studio, aperto ad Udine nel 1981, affronta temi progettuali molto differenti per scala ed oggetto ma connotati da un metodo e da una coerenza stilistica riconoscibili.

In addition to research painting develops its engagement in the fields of architecture and industrial design. His studio, opened in Udine in 1981, deals with design themes are very different in scale and subject matter, but characterized by a method and a recognizable stylistic consistency.

[ENRICO FRANZOLINI]

Il rigore delle sue origini giapponesi ha trovato nella sua esperienza in Italia l'ambiente migliore per crescere e indirizzarsi verso prodotti che coniugano le linee pulite con il comfort.

The rigour deriving from his Japanese origins have found in his Italian experience the ideal environment in which to develop and work with products that combine uncluttered design with comfort.

[KENSAKU OSHIRO]

La sua officina poliedrica spazia dall'arredamento per uffici a prodotti tecnologici, dall'urbano a particolari per cucine e bagni. Ormai consolidata la collaborazione con importanti aziende internazionali e italiane, in ciascuna di esse porta la sua esperienza cosmopolita e il suo segno elegante e discreto.

His multifaceted workshop goes from office furniture to technological products, from urban decor to items for kitchens and bathrooms. His co-operation with important international and Italian firms is now consolidated and he brings to each of them cosmopolitan experience and elegant discreet designs.

[TOAN NGUYEN]

Forme geometriche declinate per oggetti famigliari ma costruiti utilizzando i più moderni metodi produttivi. Bestenheider coniuga, nel suo stile, il rigore delle sue origini svizzere e la parte più istintiva che gli deriva dai suoi studi italiani.

He employs geometrical shapes for familiar objects made with the most modern production methods. In his style Bestenheider combines the rigour of his swiss origins and the more instinctive part developed through his Italian studies.

[PHILIPPE BESTENHEIDER]

Fa parte di quella generazione di architetti italiani caratterizzata da una formazione sia di design sia architettonica e maturata collaborando con i maestri del design italiano. I numerosi premi internazionali ricevuti per opere in queste discipline sono la conferma della qualità espressa. E' sempre stato un progettista curioso e questo lo ha portato ad aprire nuovi percorsi con opportunità linguistiche.

He is part of that generation of Italian architects who have developed their expertise in the hands of the masters of Italian design working both on structural architecture and contemporary design. The numerous International Awards he has received are proof of his innate architectural qualities. He has always different from his colleagues and this has led him to follow different architectural expressions.

[MARIO MAZZER]

Tra i più importanti designer francesi della sua generazione, fonde ispirazioni tratte da elementi naturali e quelle tratte dall'immaginario degli anni '60. E' un sostenitore del fatto che il design sia inevitabilmente destinato a un pubblico mainstream e che il designer non è uno specialista di oggetti quanto di una maniera di vita.

One of the most important french designers of his generation, he combines inspiration from natural elements with the icons of the 60s. He upholds that the inevitable destination of design is the mainstream public and that designers are not specialists in objects, but rather in a way of living.

[CHRISTOPHE PILLET]

Rigore, eleganza e ironia; così si potrebbe coniugare la sua cifra progettuale. Artista, architetto e designer, lati della stessa personalità creativa che si alimentano della percezione del contemporaneo trasformandola in oggetti e opere dichiaratamente attuali.

Strictness, elegance and irony, this is how one would define his design. Artist, architect and designer, different facets of the same creative personality that are fed by the perception of all things contemporary and works of art that are of our time.

[EMILIO NANNI]
